Electronic City, Bangalore

PROFILE SUMMARY

Results-oriented Full Stack Python Developer with hands-on project experience in Python, Flask, HTML5, CSS3, JavaScript, and Bootstrap, specializing in web application development, CRUD operations, and data handling. Proficient in building responsive user interfaces, writing backend application logic, and managing data using CSV storage. Currently working as a Python Full Stack Developer at Besant Technologies, delivering end-to-end web application features and version-controlled code using Git and GitHub. Skilled in Flask routing, form handling, client-side validation, and Bootstrap layouts, with a strong ability to communicate technical solutions clearly to both technical and non-technical stakeholders.

PROFESSIONAL EXPERIENCE

Besant Technologies Pvt Ltd

Designation: Python Full Stack Developer | **Duration:** *March 2026 – Sep 2026*

Project: Expense Tracker Web Application | **Skills:** Python, Flask, HTML5, CSS3, JavaScript, Bootstrap, CSV | **Duration:** *March 2026 – Present*

- Designed and developed a full-stack Expense Tracker web application using Python Flask for backend logic and HTML5, CSS3, JavaScript, and Bootstrap for a responsive user interface.
- Implemented complete CRUD operations to add, view, edit, and delete expense records with category, amount, date, and description fields.
- Used CSV files for persistent data storage, writing Python logic to read, update, and filter expense records and calculate total spending.
- Added client-side form validation using JavaScript and managed source code with Git and GitHub through regular commits and version history.

TECHNICAL SKILLS

Backend Development: Python (Backend Application Logic) | Flask (Web Framework) | CRUD Operations | Routing & Form Handling

Frontend: HTML5 (Page Structure) | CSS3 (Styling & Layout) | JavaScript (Interactivity & Validation) | ReactJs

Data Storage: CSV (Read / Write / Update) | File Handling | Data Filtering

Tools: Git | GitHub | VS Code | Version Control

CERTIFICATIONS

- Python Full Stack Development Course Completion Certificate – Besant Technologies (Covers: Python, Flask, HTML5, CSS3, JavaScript, and Git)
- SAP ABAP - Associate Backend Developer Cloud

ACHIEVEMENTS

- Recognized as Best Performer for delivering project modules within timelines.
- Improved application usability by adding validation and responsive design to the web application.
- Received appreciation from mentors for writing clean and well-structured code.
